HD Video Share for Joomla

Introduction

The HD Video Share is a Joomla extension for videos sharing with built-in HD FLV Player. Users can add videos from local disk, YouTube and from any URLs. One big reason for the success of our extension is because of regular updates and features. HD Video Share always aims at top customer satisfaction. Though we don't provide the source file of the player we are flexible enough in customizing the player based on the customer request at very low cost. We trust you will enjoy the process and can then look forward to tailoring HD Video Share to your own specific requirements.

Installing and using HD Video Share is generally straight forward, getting your perfect Web site takes a lot more effort but there is much, as you will discover, that has been done to make the process easier along the way. This component comes with few free modules. By using these free modules, you can change your Joomla website as video sharing website like YouTube and Vimeo.

Minimum System Requirements

- To successfully install and use HD Video Share you must have a fully operational Web server (Apache is the optimum) with Joomla! Installed.
- HD Video Share has been successfully tested on many variants within the main three OS for Windows, Linux, Apple Mac OSX with Joomla installed. It may well work on other platforms but this is less well documented.
- HD Video Share is also regularly used and tested through the main Web browsers available such as IE6+, Firefox 1.5 +, Safari, and Opera but it may also work with others.

List of HD Video Share Files

HD Video share package is available for Joomla 1.5,1.6,1.7, 2.5 and 3.x. Only logo and logo configuration are the major difference between free and paid package. Your free download includes the following modules:

1. Search Videos.
2. Featured Video.
3. Video Category.
4. Recent Videos.
5. Related Videos.
6. Popular Videos.

Installation Steps for Joomla 1.5

It is very easy to install the downloaded files.

- Log on to Joomla Administration page.
- Go to **Extensions -> Install/Uninstall ->** Choose file.
- Select the component downloaded and click **Upload File** and install.

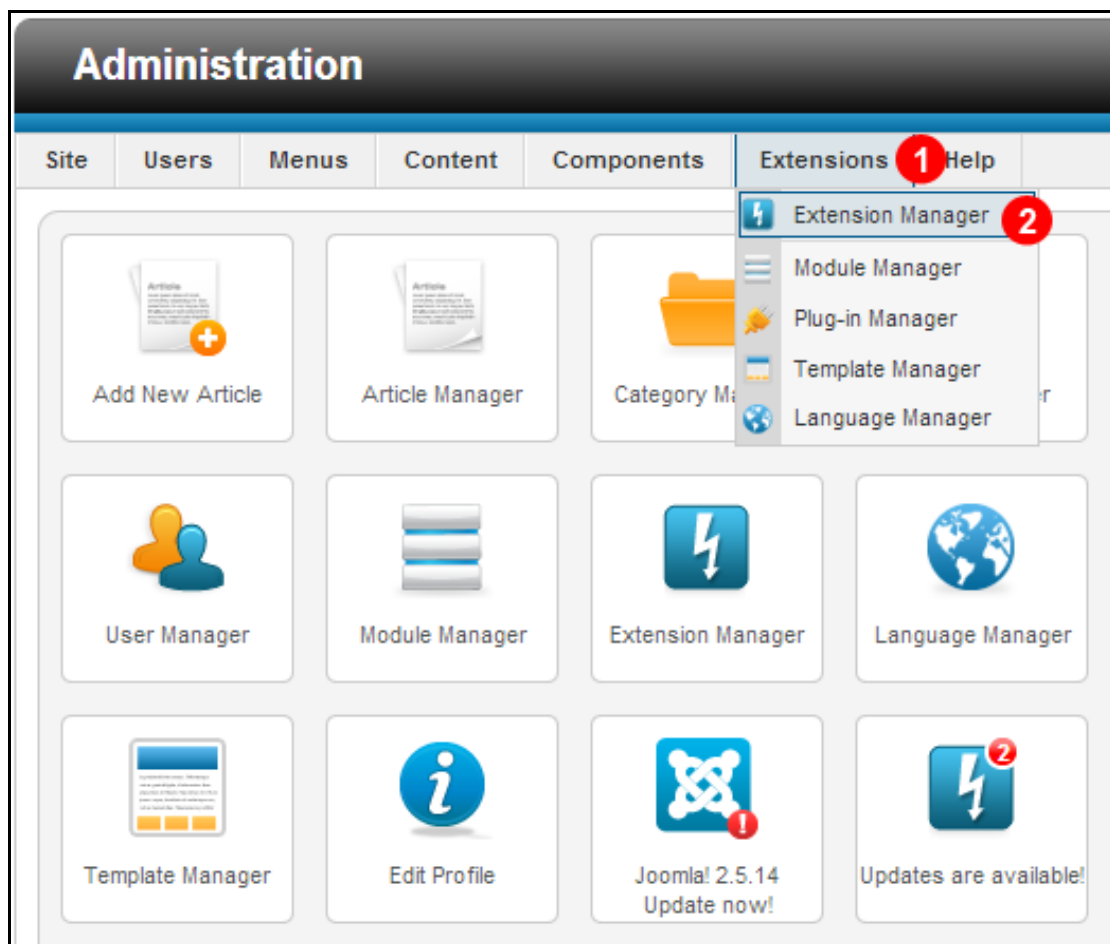

Now the component will get installed successfully. In single installation you will get all the six modules and components.

Installation Steps for Joomla 1.6, 1.7 and 2.5

1. Log on to Joomla Administration page.
2. **Extensions -> Extension Manager-->** Choose file.
3. Select the component downloaded and click **Upload File** and install.

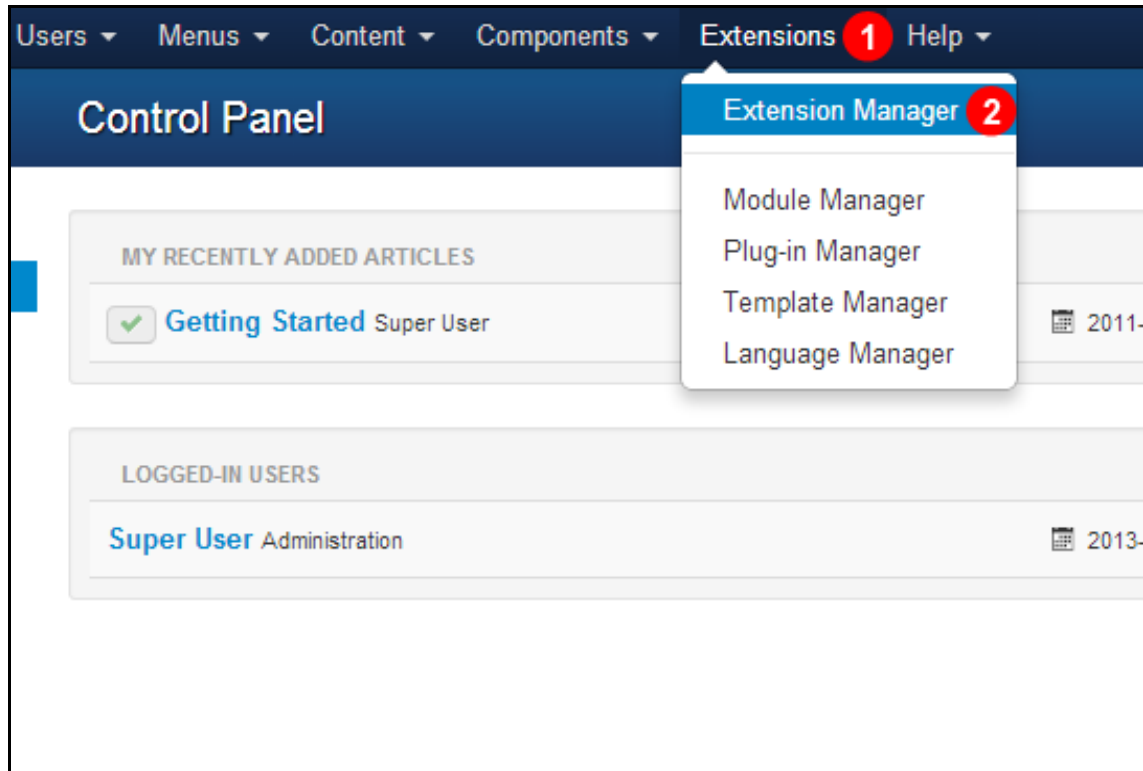

Now the component will get installed successfully. In the single installation you will get all the six modules and components.

Installation Steps for Joomla 3.0

1. Log on to Joomla Administration page.
2. **Extensions -> Extension Manager-->** Choose file.
3. Select the component downloaded and click **Upload File** and install.

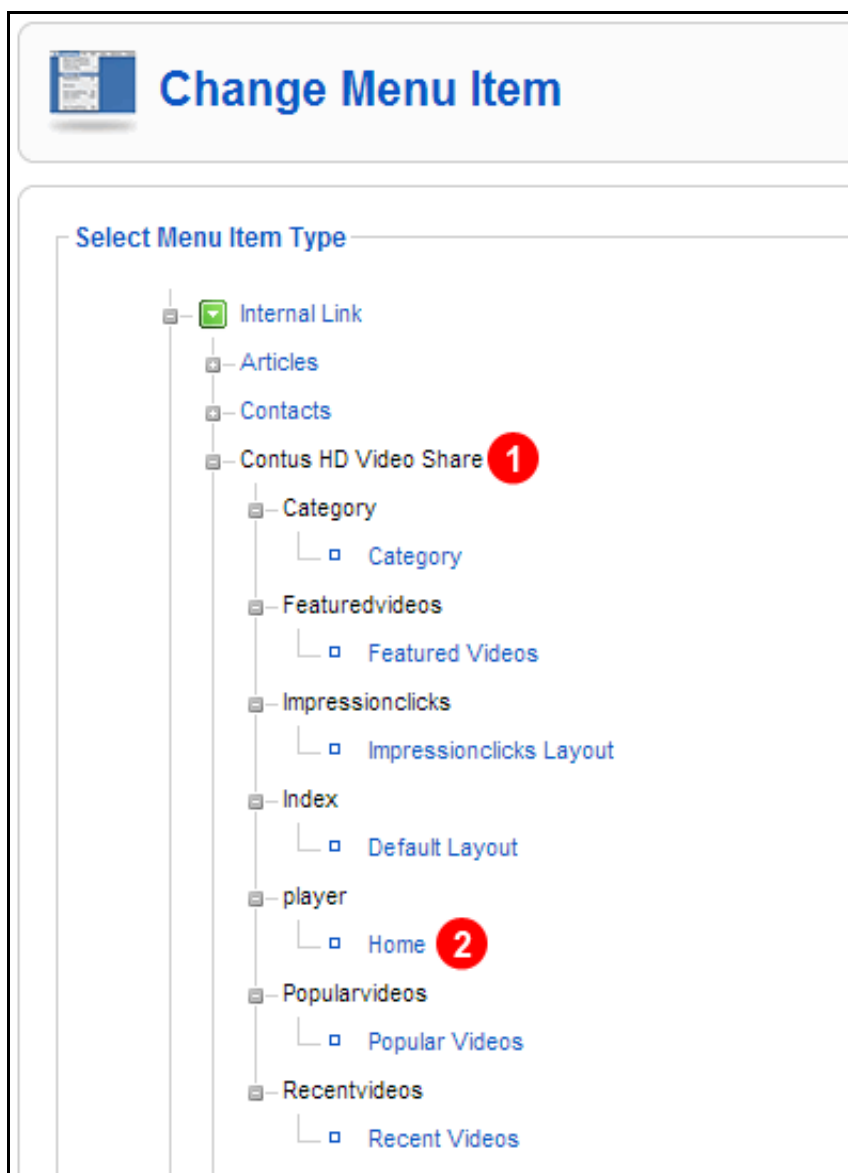

Now the component will get installed successfully. In the single installation you will get all the six modules and components.

Configuring HD Video Share

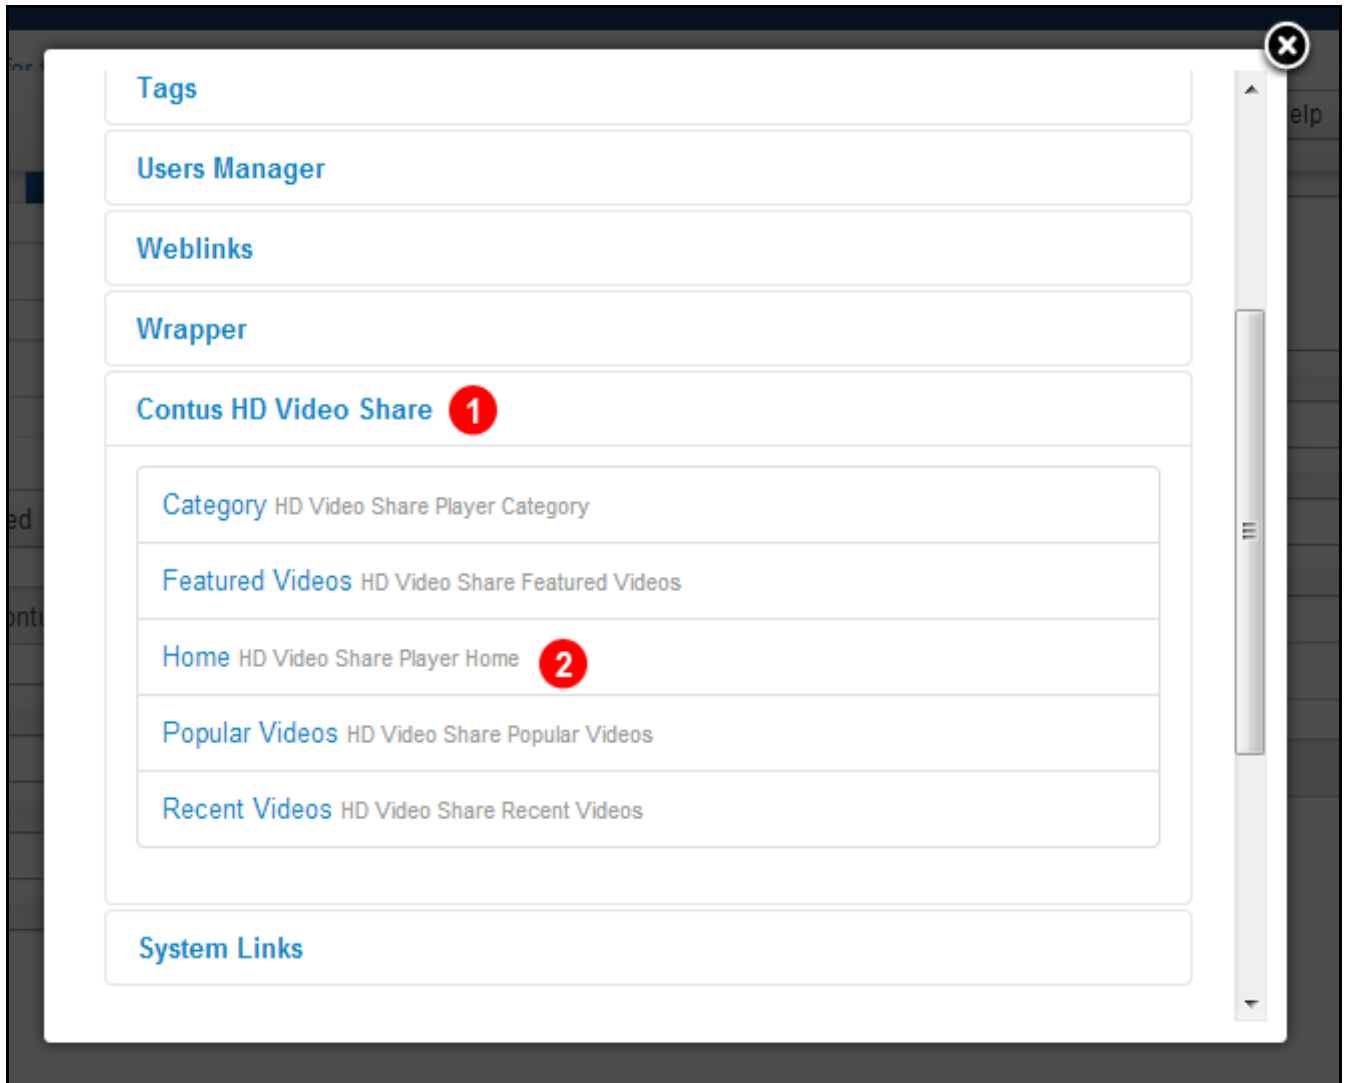

To assign component in Joomla 1.5:

Log on to Joomla **Admin** -> **Menus** -> **Your_Menu_name** and select the menu where you want to assign the component, Click **Change Type** -> **Select HD Video Share** from the list -> Click **Index** (Default Layout) -> **Name the Menu** -> **Save**.

To assign component in Joomla 3.0:

To assign this component in a menu, Log on to Joomla **Admin** -> **Menus** -> **Your_Menu_name**. Here select the menu item where you want to assign the component, Click **"select"** -> **Select "Home"** under Contus HD Video Share from the popup.

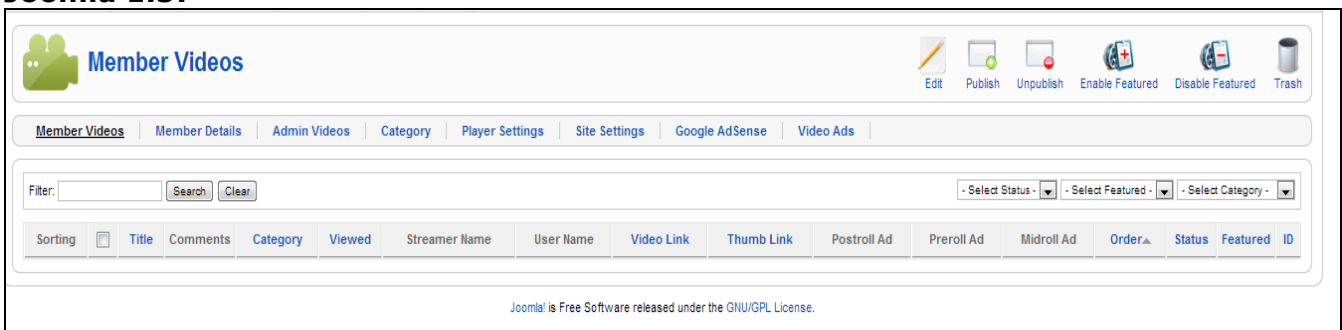

Apart from installation and assigning the component to the menus, remaining all the steps is same in Joomla **1.5, Joomla 1.6, 1.7, 2.5, and 3.0+**

Member Videos

This is the primary tab: it lists all the videos added by the users from the front end. On this page you can do the following.

1. You can sort the videos by dragging on it.
2. You can modify the comments under comment column.
3. The corresponding streamer name, streamer path, videos link, thumbnail link for that member added will be display under the responding columns.
4. Also can view the postroll ads, preroll ads, midroll ads videos.
5. You can search/Filter videos of any user
6. You can view Ratings and Number of views of any video.
7. You can view/delete videos of any particular user.
8. You can either choose publish or un-publish any videos added by users
9. You can either choose enable featured or disable featured. It has been included in the features videos list.

Joomla 1.5:

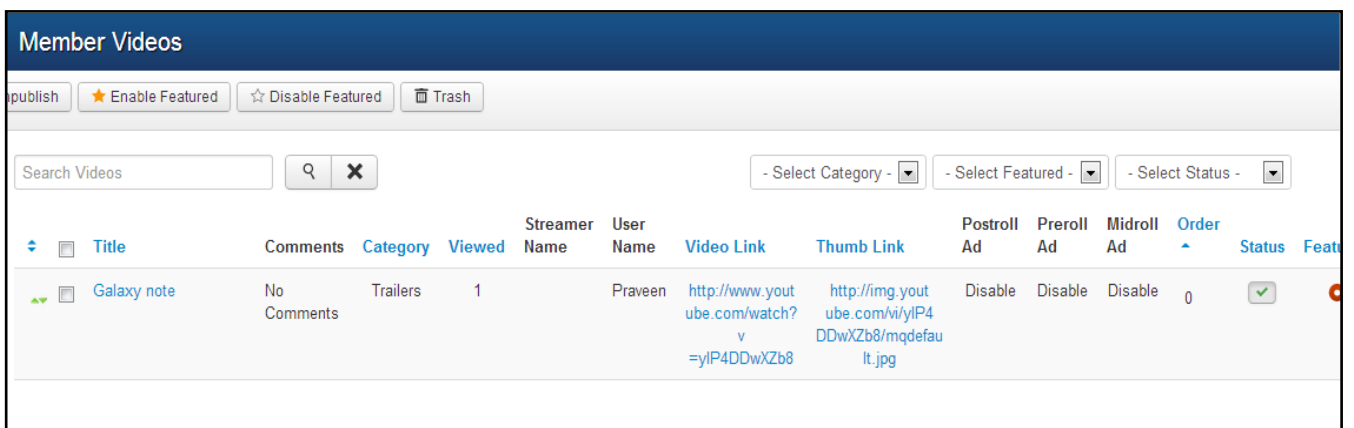

The Joomla 1.5 Member Videos interface shows a top navigation bar with icons for Edit, Publish, Unpublish, Enable Featured, Disable Featured, and Trash. Below this is a sub-navigation bar with tabs: Member Videos, Member Details, Admin Videos, Category, Player Settings, Site Settings, Google AdSense, and Video Ads. A search bar with 'Filter:', 'Search', and 'Clear' buttons is present. To the right of the search bar are three dropdown menus: '- Select Status -', '- Select Featured -', and '- Select Category -'. Below these is a table with columns: Sorting, Title, Comments, Category, Viewed, Streamer Name, User Name, Video Link, Thumb Link, Postroll Ad, Preroll Ad, Midroll Ad, Order, Status, Featured, and ID. At the bottom, it says 'Joomla! is Free Software released under the GNU/GPL License.'

Joomla 2.5:

The Joomla 2.5 Member Videos interface is similar to Joomla 1.5 but with updated icons. The sub-navigation bar and search bar are identical. The table columns are the same. At the bottom, it says 'Joomla! 2.5.7' and 'Joomla! is free software released under the GNU General Public License.'

Joomla 3.0:

The Joomla 3.0 Member Videos interface has a more modern design. The top bar includes buttons for 'publish', '★ Enable Featured', '☆ Disable Featured', and 'Trash'. The search bar is labeled 'Search Videos' and has a magnifying glass icon. The table columns are the same. At the bottom, it says 'Joomla! is free software released under the GNU General Public License.'

Admin Videos

- This is the place where admin can add videos to HD Video Share categories. HD Video Share accepts both streaming and normal way of playing videos. By default it is set to None where you can add videos through following methods Upload, Direct URL, YouTube URL and FFMPEG.
- After adding the videos via any below methods, kindly update the video info section where you can add Title, Description, Target URL for the video, assign Category, sort order (recently we added Ajax sorting where you can sort the videos simply by Click and drag from the Videos tab), enable post roll and pre roll ad for the respective videos.

Adding videos through Upload method:

Four fields will be visible when Upload is selected.

- If you want to give the users an option to switch between HD and Non HD videos you have to upload two formats of videos.
- If you don't want to give the users a choice then you can upload any one of the video, either HD or Non HD. Leave the second field "Upload HD Video (optional)" as blank.
- After uploading the videos, you can also have options to upload thumb image and preview image for the corresponding videos.
- Below this, there is video info section where you can add Title, Description, Target URL for the video, Assign Category, sort order (recently we added Ajax sorting where you can sort the videos simply by Click and drag from the Videos tab).
- Also, enable post roll and pre-roll ads for the videos.

Adding videos through URL method:

- Upload the videos and images through FTP to any location on your web server.
Example: you can add videos and images in the respective video and images to videos folder on your web server and provide the absolute path here.

Eg: <http://www.yourdomain.com/videos/video.mp4>
<http://www.yourdomain.com/images/image.jpg>

Note: Generate Details option will appear only when you paste YouTube link.

Adding videos through FFMPEG:

- Before you start uploading the videos using FFMPEG, make sure you provided the path of your FFMPEG on the "HD Video Share Settings".
- If you are not sure about the path to mention, kindly contact your hosting provider for the details.
- After you set the path to FFMPEG you can upload any HD files to convert it to lower resolution.
- The Thumbnail image and the Preview image will be create automatically.

Separate tags by space

Adding videos through RTMP:

- Provide the Streamer path which would be `rtmp://edge01.fms.dutchview.nl/botr` and the video URL would be `bunny.flv` from the below RTMP file
`rtmp://edge01.fms.dutchview.nl/botr/bunny.flv`
- Also there is a field for thumb and preview image URL which you can mention
streamerpath = [protocol]/[servername]/[application] URL=[streamname]

1) [protocol]: You can use the following protocols: `rtmp`, `rtmpt`, `rtmpe`, `rtmpte`, `rtmps`

2) [servername]: this is the IP Address, or the domain name of your server. (i.e.localhost)

3) [application]: use "vod" unless you have changed the name of the folder

4) [streamname]: use the name of your video file (including the extension).

eg :

`rtmp://localhost/vod/mp4:mystream.f4v`

`rtmpe://localhost/vod/myvideo.flv`

The screenshot shows the Joomla! Admin Videos interface. The top navigation bar includes links for Member Videos, Member Details, Admin Videos (selected), Category, Player Settings, Site Settings, and Google AdSense. The main content area is divided into two sections: Video and Video Info.

Video Section:

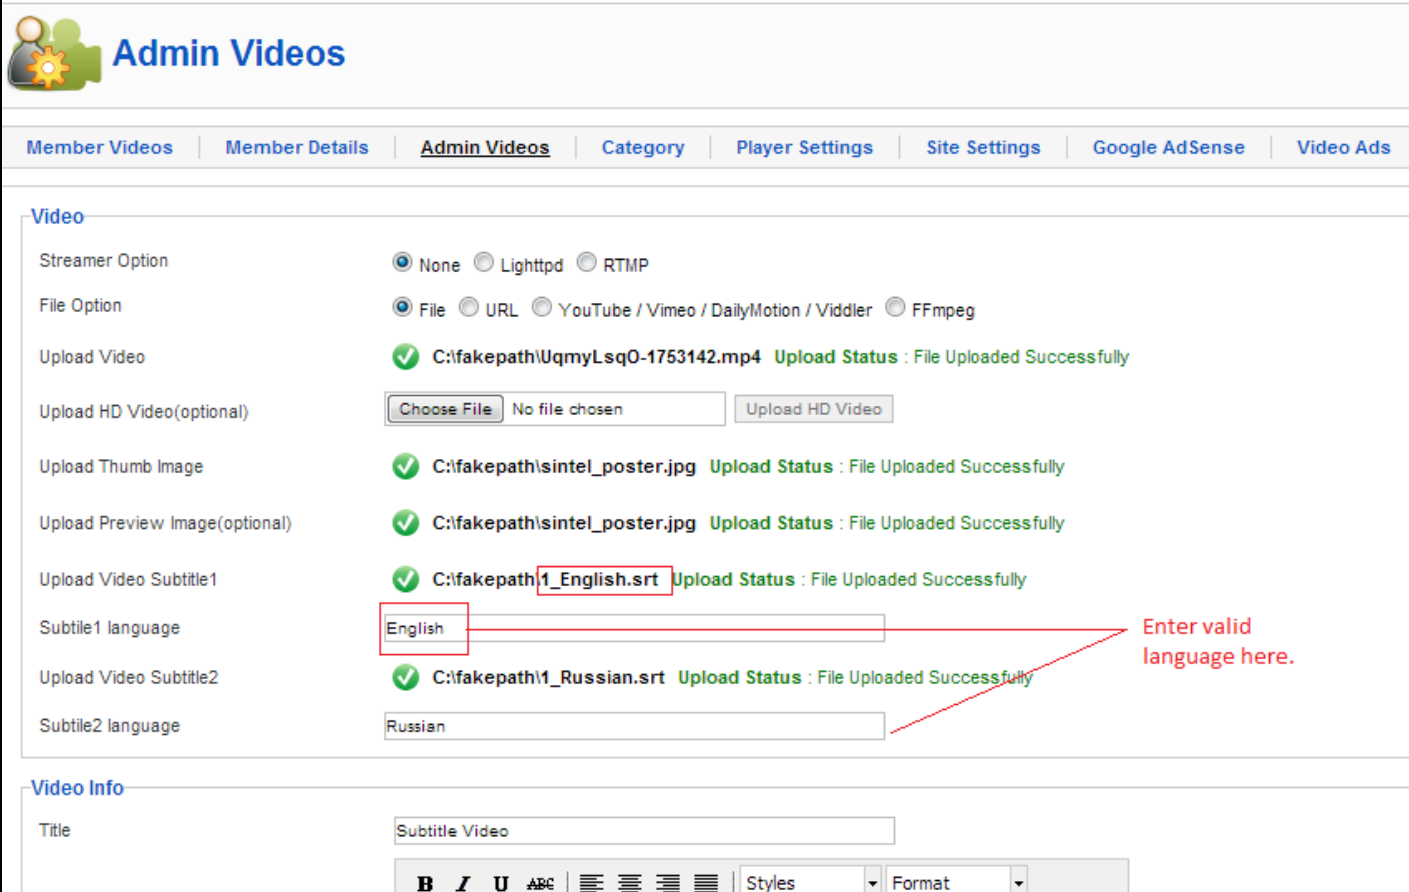

- Streamer Option:** Radio buttons for None, Lighttpd, and RTMP (selected). A red arrow points to the RTMP option, labeled with a red circle containing the number 1.
- Streamer Path:** Text input field containing `rtmp://edge01.fms.dutchview.nl/botr`. A red arrow points to this field, labeled with a red circle containing the number 2.
- Is Live:** Radio buttons for Yes and No (selected).
- File Option:** Radio buttons for File, URL (selected), YouTube / Vimeo / DailyMotion / Vidler, and FFmpeg.
- Video URL:** Text input field containing `bunny.flv`. A red arrow points to this field, labeled with a red circle containing the number 3.
- Thumb URL:** Text input field containing `http://www.lamella.cl/admin/wp-content/uploads/2010/08/BBB.jpg`. A red arrow points to this field, labeled with a red circle containing the number 4.
- Preview URL:** Text input field containing `http://themejug.com/demo/roma/files/2012/08/bbb-splash1-700x400.png`.
- Upload Video Subtitle1:** Includes a Choose File button, a No file chosen status, and an Upload Video Subtitle1 button.
- Upload Video Subtitle2:** Includes a Choose File button, a No file chosen status, and an Upload Video Subtitle2 button.

Video Info Section:

- Title:** Text input field containing `RTMP Video`.
- Rich Text Editor:** Includes a toolbar with various formatting options (Bold, Italic, Underline, ABC, etc.) and a text area.

Subtitle

You can upload srt files to enable subtitle option for your videos. And by now you can set two different languages for that particular video. However, ensure to enter a valid language (e.g. "English" or "Russian") in the "Subtitle 1 or 2 language" field as shown below in figure.

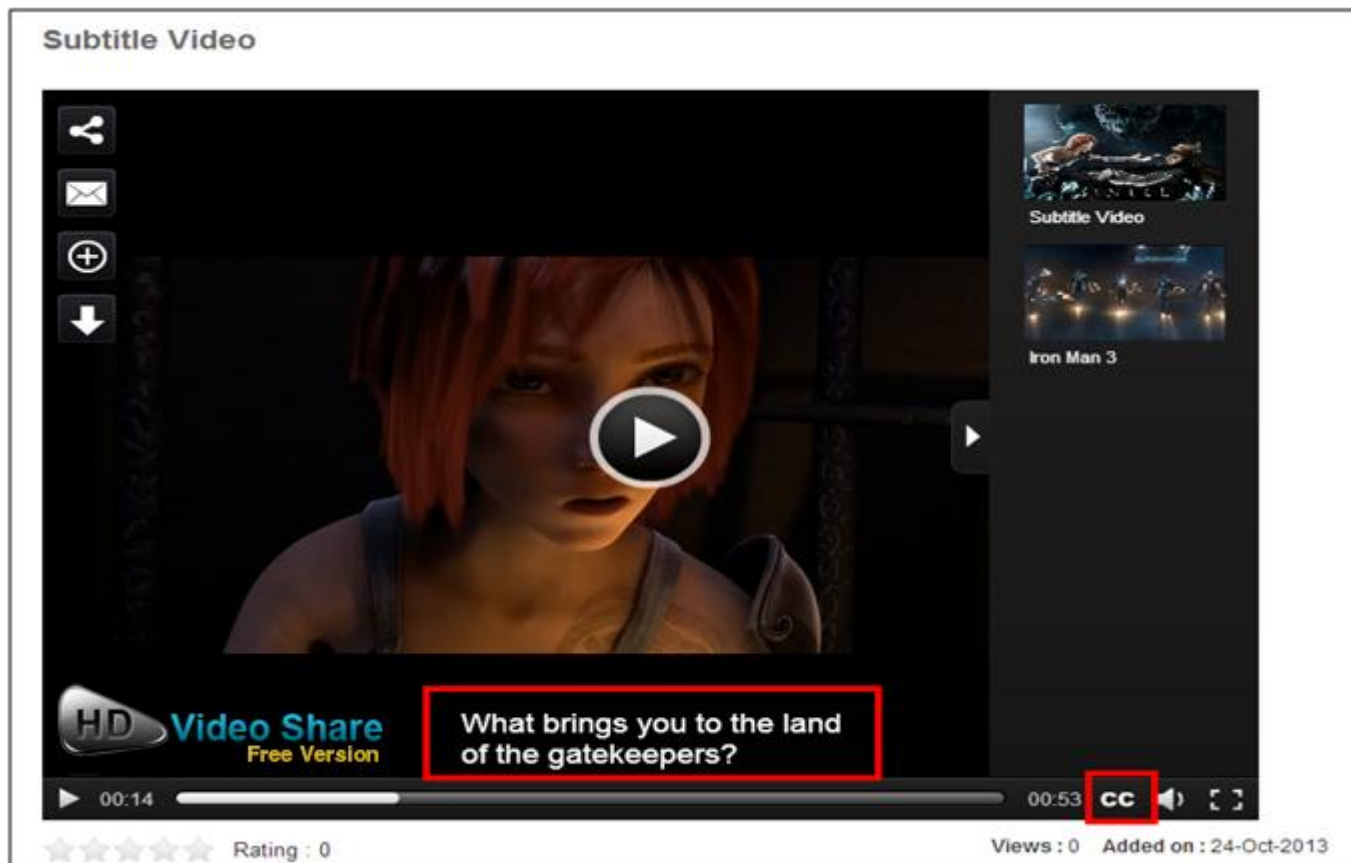

The screenshot displays the Joomla! Admin Videos interface. At the top, there is a navigation bar with tabs: Member Videos, Member Details, Admin Videos (selected), Category, Player Settings, Site Settings, Google AdSense, and Video Ads. Below the navigation bar, the 'Video' section is active. It contains several upload options:

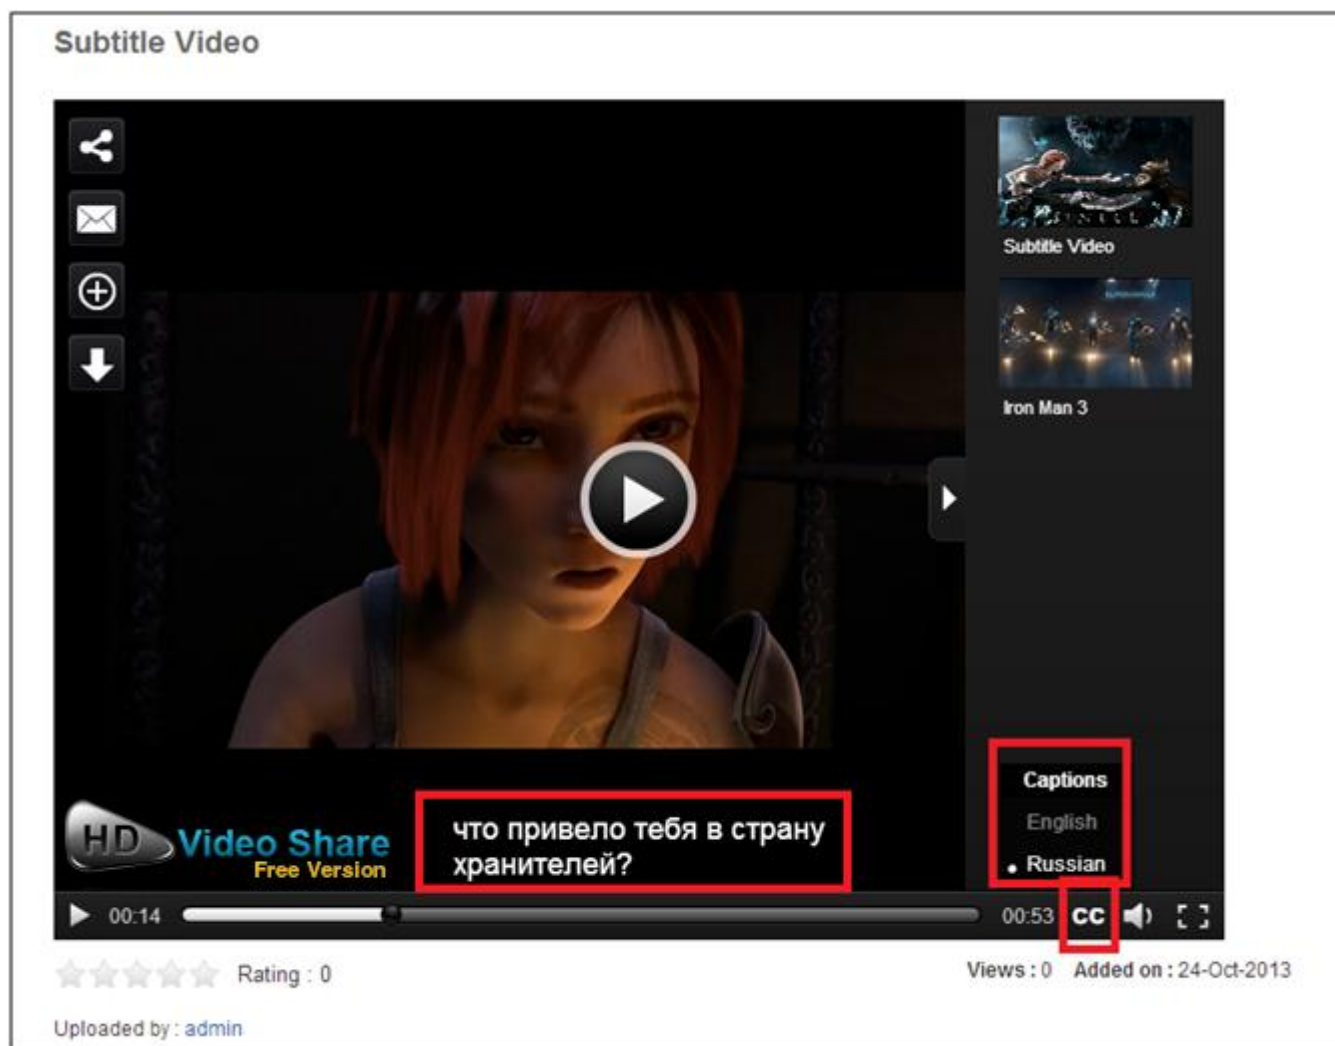

- Streamer Option:** Radio buttons for None (selected), Lighttpd, and RTMP.
- File Option:** Radio buttons for File (selected), URL, YouTube / Vimeo / DailyMotion / Vidder, and FFmpeg.
- Upload Video:** A green checkmark indicates successful upload of 'C:\fakepath\UqmyLsqO-1753142.mp4'.
- Upload HD Video(optional):** A 'Choose File' button, 'No file chosen' text, and an 'Upload HD Video' button.
- Upload Thumb Image:** A green checkmark indicates successful upload of 'C:\fakepath\intel_poster.jpg'.
- Upload Preview Image(optional):** A green checkmark indicates successful upload of 'C:\fakepath\intel_poster.jpg'.
- Upload Video Subtitle1:** A green checkmark indicates successful upload of 'C:\fakepath\1_English.srt'.
- Subtitle1 language:** A text input field containing 'English'. A red box highlights this field, and a red arrow points to it with the text 'Enter valid language here.'
- Upload Video Subtitle2:** A green checkmark indicates successful upload of 'C:\fakepath\1_Russian.srt'.
- Subtitle2 language:** A text input field containing 'Russian'.

Below the 'Video' section is the 'Video Info' section, which includes a 'Title' field with the text 'Subtitle Video' and a rich text editor with formatting options (B, I, U, ABC, list, link, unlink, Styles, Format).

Subtitle1 in "English" for example

Subtitle2 in "Russian" for example

Adding videos through Embed Code:

This option is available only for the purchased customers. Once you entered the license key in Player Settings page, Embed code option will be enabled in Admin Videos page.

The screenshot displays a YouTube video player for the video 'Amazing Nature full HD 1080p' by 'TheChokAAA'. The video has 1,632,773 views and 3,946 likes. The 'Share' button is circled with a red '1'. Below the video, the 'Embed' button is circled with a red '2'. The embed code is shown in a text box, with the 'Embed' button circled with a red '3' pointing to it. The embed code is:

```
<iframe width="560" height="315"
src="//www.youtube.com/embed/mcixldqDIEQ" frameborder="0"
allowfullscreen></iframe>
```

On the right side, there is a list of recommended videos:

- Beautiful Nature - Deep Sea 1080p HD by wittydud, 280,144 views, 1:39:01
- Beautiful Nature - Autumn 1080p HD by wittydud, 228,068 views, 9:53
- Our Living Planet 1080p HD by wittydud, 149,977 views, 10:12
- Beautiful Natural World 1080p HD by wittydud, 74,320 views, 7:03
- Tsunami - Caught On Camera - P1 by John Daniel, 54,638,097 views, 10:58
- Urlatoarea Waterfall 1 hour Full HD 1080p Relaxation with Pure Nature by Gabriel G, 24,577 views, 1:00:35
- Beautiful Nature - Winter 1080p HD by wittydud

Player Settings

This is the global settings for HD Video Share. Modify player settings by clicking "**Edit**" button at the top right.

Player Settings

- **Buffer time** - You can set the buffer time of the player to save portions of a streaming Media file to local storage for a playback.
- **Volume** - You can set the default volume level when the video plays.
- **Enable Download** - You can enable or disable Download button on the player.
- **HD Default** - You can set the HD videos to play by default. Make sure you have declared HD Video path/uploaded HD videos.
- **Related Videos** - You can decide whether you want to display related videos within the player or not.
- **Playlist Open** - You can decide whether you want the related videos within the player always in open status or not.
- **Playlist Auto play** - You have two options for playlist auto play (enable/disable). If you enable the Option, it will start playing all the videos from the category. If you want to disable the option you need to select with play button for each videos.
- **Related Videos view** - You can decide whether you want to display the related videos center like YouTube or side.
- **FFMPEG Binary path** - Declare the FFMPEG path given by your hosting provider if you want to generate duration for upload videos. You can leave it as it is if you are not aware of FFMPEG.
- **Normal screen scale** - You have three choices to set. Aspect ratio which controls the player size proportionally, fit-to-screen which plays the video to the player size that Declared, Original size plays in original video size irrespective of the Player size declared.
- **Full screen scale** - This setting affects only on full screen mode.
- **Embed Visible** - It is mainly used for embedding video onto web page. You can decide whether you want to display embed code under the player in front end or not
- **Skin auto hide** - You can enable/disable skin controls to be displayed on the player.
- **Display Email** - You can disabled/enabled Email here.
- **Display Full screen** - Full screen button can be disabled from here for player control.
- **Display Progress Bar** - Progress bar can be disabled from here for player control.
- **Timer** - Timer on the player controls can be enabled/disabled.
- **Share Button** - Share button on the player can be disabled here.
- **Volume** - Volume button on the player can be disabled here.
- **Auto Play** - If it is enabled, video will start playing without users clicking the play option, else

you need to select play button if option is disabled in backend.

- **Width** - You can specify the width of the player in pixels (px).
- **Height** - You can specify the width of the player in pixels (px).
- **Stage color** - Set the background color for the player in the format.(Ex: 0xddddddd)
- **Description Visible** - You can decide whether you want to display description of the video within the player or not.
- **Display Default Image** - You can decide whether you want to display default preview image (when it is not exist) for the video within the player or not.

Google AdSense

If you have account on Google AdSense, You can configure it here. To use it, you need to enable **"Publish"** on this page to display the ads in components, modules and plugin. You can do the following configuration for Google AdSense,

- Option for showing the ads always and close it in the specified timings.
- Option to set the timings to reopen the ad again once it gets closed.

The screenshot shows the Joomla! administration interface for Google AdSense. At the top, there's a header with the Google AdSense logo and a navigation bar with tabs: Member Videos, Member Details, Admin Videos, Category, Player Settings, and Site Settings. The main content area is titled "Google AdSense" and contains a text area for entering the AdSense code. The code is pre-filled with a sample script. To the right of the code area, it says "Default size 468 x 60". Below the code area, there are three configuration options: "Option" with radio buttons for "Always Show" (selected) and "Close After:" followed by a text input field with "0" and "Sec"; "Reopen" with a checked checkbox and "Re-open After:" followed by a text input field with "10" and "Sec"; and "Published" with radio buttons for "Yes" (selected) and "No".

```
<script type="text/javascript">!--
google_ad_client = "pub-2847326838202418";
/* 468x60, created 2/13/10 */
google_ad_slot = "8176283039";
google_ad_width = 600;
google_ad_height = 60;
//-->
</script>
<script type="text/javascript">
```

Enter the Code: Default size 468 x 60

Option ☒ Always Show ☐ Close After: 0 Sec

Reopen ☒ Re-open After: 10 Sec

Published ☒ Yes ☐ No

Video Ads

Under this tab, you can add ads for preroll/postroll or midroll. Here you can upload or provide URL videos for ads to make it to be display it as pre roll or post roll ads or mid roll ads while adding videos.

Also you can provide the target URL if you wants your user to be redirected to the particular site when clicks on the videos ads.

- Click hits URL - Here you can get the view count of how many times the ad shows on the player with the video.
- Impression URL - Here you can get the view count of how many times the user clicks on the ad and goes to the target URL.

This is how HD Video Share Home page will be displayed based on the Joomla template that you have selected.

Client Side Settings

Login:

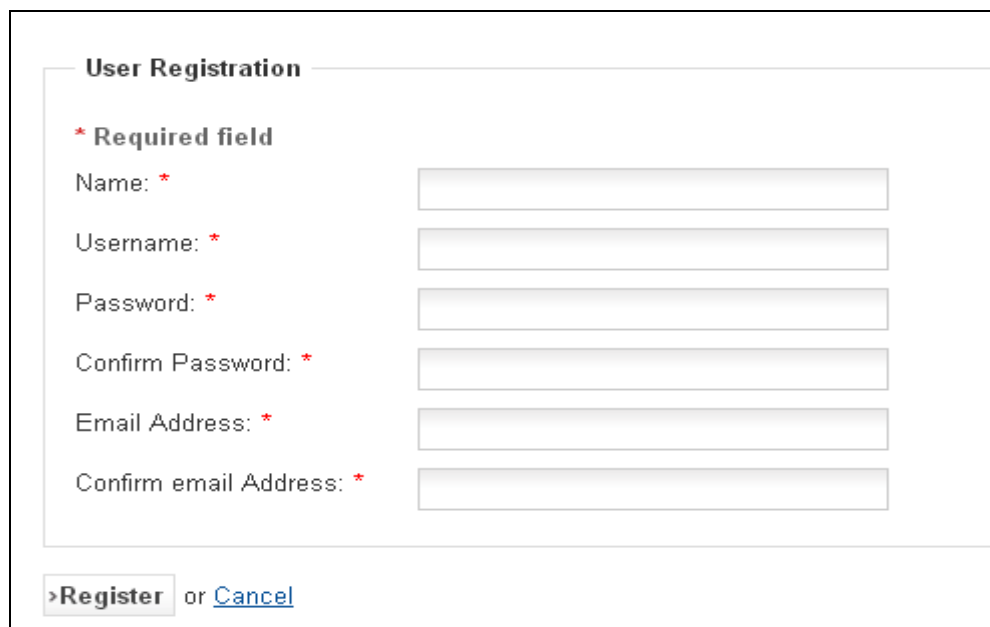

Separate Signup/Login is not needed to register with HD Videos Share. Users can login using Joomla Username and Password, i.e. login into Joomla website and access HD Video Share application.

The image shows a sample login form titled "Login Form". It contains two input fields for "User Name" and "Password". Below these is a "Remember Me" checkbox. A "Log in" button is positioned below the checkbox. At the bottom, there are three links: "Forgot your password?", "Forgot your username?", and "Create an account".

The above is the sample login form. The Login Form look and place is based on your Joomla Template and your Joomla configuration.

Registration Form:

The image shows a "User Registration" form. It has a title "User Registration" at the top. Below the title, there is a section labeled "* Required field". This section contains six input fields, each with a label and a red asterisk: "Name: *", "Username: *", "Password: *", "Confirm Password: *", "Email Address: *", and "Confirm email Address: *". At the bottom of the form, there is a "Register" button and a link to "Cancel".

- **Username:** This is the username you will be identified by in the HD Videos Share. It must be shorter than 6 characters. It is not possible to use the name of an existing HD Video share member.
- **Password:** You must choose a password that is at least six characters long. The password will be stored Encrypted in the database of the HD Video Share, so it is impossible even for someone with access to the database to know your password.
- **Confirm password:** To exclude mistakes (for example mistyping) you have to retype your password.
- **Email address:** You need to enter a valid email address for the case that you forget your password. Once you have registered, you will be able to login with this username and password.

Once you have registered, you will get the following links “MyVideos” and “Logout”.

The screenshot displays the Joomla! HD Video Share 3.4.1.0.1 interface. At the top right, there are links for "My Videos" and "Logout". The main content area features a video player for "The Hobbit: The Desolation of Smaug International Trailer". The video player includes a play button, a progress bar, and a rating of 2 stars. To the left of the video player, there is a "Video Category" list and a "Popular Videos" section. To the right, there is a "Featured Videos" section. The interface is designed to allow users to upload and share videos, with a focus on HD quality.
